**RELIABILITY**

Nanotek Consulting Corp. is a Microsoft Gold Certified company who offers the full range of consulting services, from strategic IT consulting, systems integration, infrastructure management, customized software solutions to outsourcing, and training. We work with our clients to significantly improve productivity and reduce costs by applying the right mix of services.

We specialize in small to medium businesses in the finance, manufacturing, technology and service sectors, plus we are one of the few IT consulting companies that specialize in the Healthcare industry by managing the

infrastructure and software of several Medical Clinics in and around GTA and Niagara Falls.

Our flexible approach guarantees that short-term or long-term, onsite or offsite, we can provide the professional resources you need. No matter what your challenge, Nanotek Consulting services can help you get the most out of your resources. Throughout the project life cycles (project initiation, planning, execution of project, monitoring and controlling the project and closing), we provide full support and guidance to our clients.

WE WOULD LIKE TO HEAR FROM YOU. TOLL FREE: (888) 913-6266 INFO@NANOTEK.CA

# OUR SOLUTIONS

## NanoConsult

Whether you're looking to completely outsource your infrastructure design and implementation, or bring in outside expertise to help guide internal resources, our experienced consultants and engineers have addressed many demanding business requirements in complex environments, while clearly communicating the impact and expected value resulting from the investment.

## NanoCloud

Cloud computing delivers greater value-per-dollar than traditional client-server networks, all while making your applications, files and other services available from any Internet-connected device, rather than having to work exclusively from a specific computer at the office. At the simplest level, cloud computing is a way to consolidate all IT services (desktops, data, emails, VoIP, databases, etc...) in a centralized facility, and making those services available worldwide over the Internet to any connected user.

## NanoBackup

Nanotek Business Continuity Solutions will help you reduce or avoid revenue losses; protect your mission-critical data by leveraging our infrastructure and support services; reduce downtime and increase employee productivity; enable you to resume business and employee activities more quickly and cost-effectively following a disaster or other unplanned interruption.

## NanoVoice

Delivering Unified Communications technology by unifying voice mail, fax and email as well as providing presence information and full video capability. Giving total freedom to the user by enhancing mobility and allowing staff to work remotely. NanoVoice includes a web-based user portal that gives extension users complete mobility and independence, and the ability to configure extension preferences without help from IT staff. Includes a free Windows VoIP phone, and free VoIP phone apps for iPhone and Android that can be used in or out of the office.

## NanoArchiver

Keep a copy of all your emails in easily accessible, cloud-enabled email archive, fully searchable and accessible from any web browser. You can access any past emails, inbound or outgoing, download attachments, and respond and forward emails straight from the website. We can also filter your emails for spam and viruses before they even get to your computer. Various packages are available.

## NanoSecure

An effective solution for securely sending sensitive content over the internet. By using automatic triggers you can have tailored to your liking, secure emails will allow a recipient to access an online, SSL-protected webstore where they can safely view the message, reply to the sender in a secure fashion, or download any content they have received. Automatic message expiry helps ensure that data is not left around to be forgotten and later found by prying eyes.

## CORE VALUES

### Customers first.

Relationships matter at Nanotek. Close working partnerships yield more creative, effective, and valuable results for our customers. We take a practical, customer-centric approach to establish the relationships that help us know how to tailor solutions to our customers' needs.

### Integrity.

We do the right thing. Integrity builds long-term trust among our shareholders, employees, customers, and partners, helping us deliver a superior end-user experience.

### Innovation.

We take risks to maintain our competitive advantage. We value creative ideas for improving processes across all parts of the business. From engineering to purchasing, we believe internal innovation has the power to drive a better total experience for our customers and our people.

### Outstanding people.

We attract, develop, and reward exceptional people. Our people are motivated, experienced, disciplined, empowered, collaborative, and accountable, and we are proud to enable professional growth and development for employees to achieve their long-term career goals.

These values capture who we are and what guides us as a company, helping us create a culture in which we continue to build on our success, exceed customers' expectations, and recognize and reward individual and team performance.

### Testimonial.

*BILD GTA: "When it came to IT solutions, we were quickly finding out that many of our sister associations were getting pushed around, and we certainly did not want this happening to us. The idea was quite simple: Find a solution provider who will work with us, rather than just for us. The world around us seems to be changing in terms of technology and we as an association needed someone to simply explain it to us in laymen terms. Nanotek has always done a great job of helping us to see the technological opportunities out there and how we can maximize it as a non-profit association. Simply put, we have found the solution provider who will work with us."*

*Jonathan Dalima Director, Finance, BILD*
